# The operating environment

## The housing market – Price development

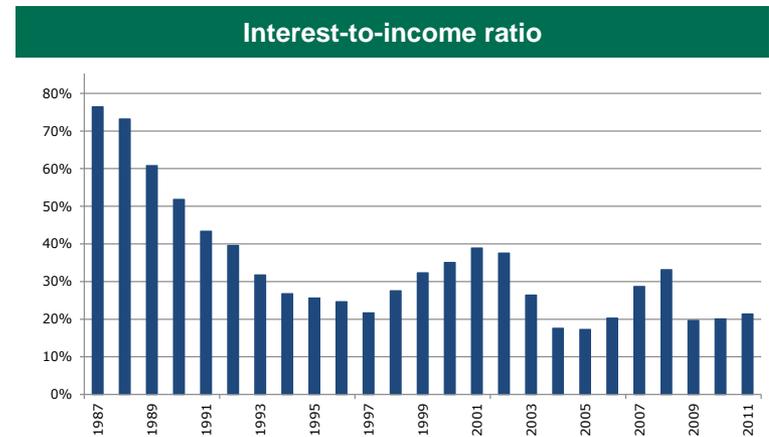

Source: S&P Case-Shiller Home Price Indices Composite 20, Realkreditrådet, Halifax House price Index, Statistics Sweden, Eiendomsverdi

- House prices have increased by an average of 11% per annum in 2004-2007 with house prices estimated to have grown 41% since end of 2008
- This has been spurred by an environment of low interest rates, high wage growth, population growth and supply constraints
- When deflated by income growth the increase in house prices is more moderate – indeed the real median wage in Norway has increased by 52% in the period 1997 to 2009
- Household solid income growth and lower interest rates determine the affordability of housing

Source: Eiendomsverdi

## The operating environment

# The housing market – Drivers of the housing market

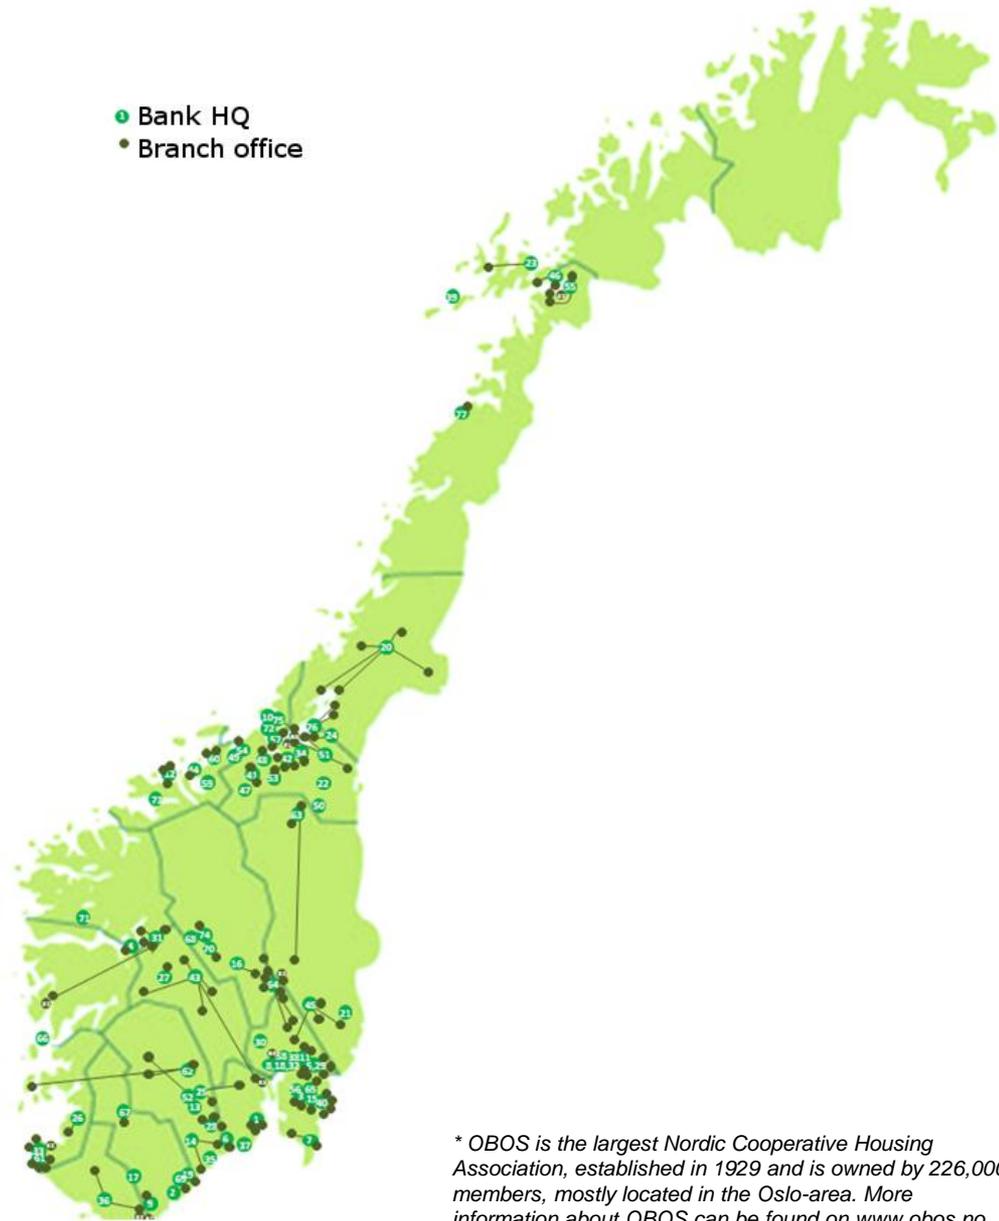

- Low housing starts and a strong population growth have been significant drivers of the strong growth in the Norwegian housing market
- New home construction is up on the record lows of 2009 and 2010 but are levelling off – while still down from the boom of 2005 – 2007 they have evolved recently towards the higher end of construction. This should mitigate the momentum on house prices
- The population growth has essentially been driven by a growth in the birth rate in Norway (1.98 in 2009, 1.95 in 2010 and 1.88 in 2011). A growth in immigration is also noteworthy since the trough of 2009 and is also a strong contributor as migrant population gets settled professionally and culturally

## Strong incentive structure

- With regards to the mortgages in the Terra BoligKreditt cover pool there is a 3 pillar guarantee mechanisms; this is to ensure that the originating banks are held responsible for potential losses on mortgages they distribute for TBK

**Moody's:** "The members of the Terra Group are incentivised by guarantee obligations to pass high quality loans to the issuer."

# Terra BoligKreditt

## Structure of support

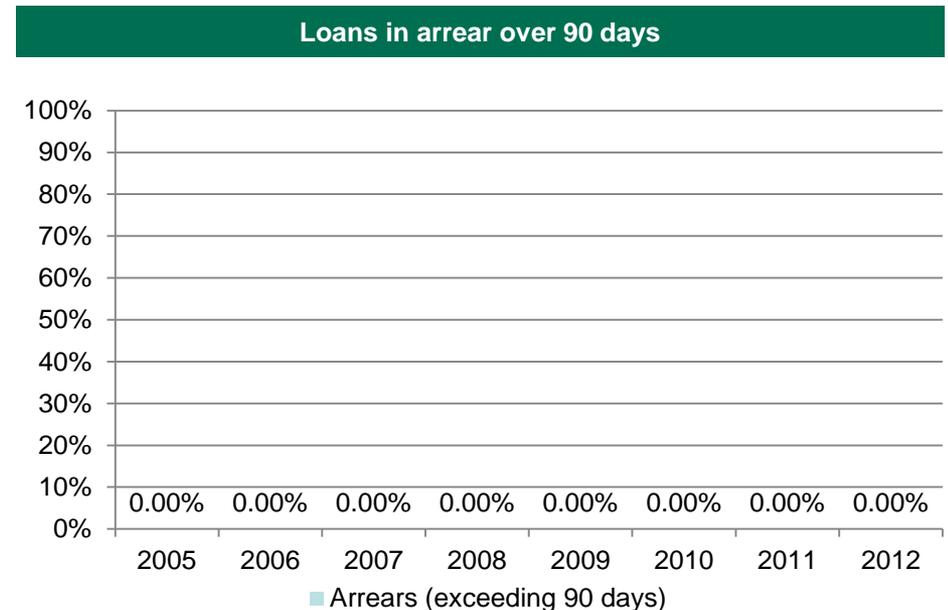

- **The Note Purchase Agreement (NPA)** is structured to ensure that TBK has liquidity, at all times, sufficient to pay the Final Redemption Amount of any series of Notes in a rolling twelve month period
- The NPA replaces the former NOK 3bn facility described in earlier Offering Circulars to the EMTCN Program
- **The Shareholders' Agreement** is structured to ensure that TBK will uphold a sufficient capital adequacy ratio at all times
- The Owner Banks are obliged to pay their pro-rata share of any capital increase adopted by the TBK's general meeting and of any capital instruments to be issued
- The agreements are structured to meet the Moody's criteria to categorize as a Category 2 support agreement for Specialized Covered Bond Issuers

# Terra BoligKreditt

## No arrear exceeding 90 days

- Terra BoligKreditt has **never** experienced mortgages being delinquent for more than 3 months
- The guarantees from the banks further reduces credit risk and helps to avoid cherry-picking of mortgages
- In case there is a delayed payment (> 35 days) the Bank which has transferred the mortgage need to solve the problem within 2 months by:
  - Giving the client extra credit
  - Transferring the loan back to the bank (305 loans since start-up of company in 2004)
  - Paying the full guaranteed amount to TBK

# Terra BoligKreditt

## Top-notch collateral score by Moody's

- On 19 July 2012, Moody's released the 10th edition of their EMEA Covered Bonds monitoring overview. The primary objective of this report is to provide transparency to Moody's covered bond ratings
- In the report Terra BoligKreditt is ranked the best out of over 200 covered bond issuers in terms of quality of collateral in the cover pool which is measured by the Collateral Score\*
- Starting from Q2 2012, Moody's changed its methodology by applying a transaction minimum credit enhancement level, which resulted in TBK's new collateral score at the floor level of 5% instead of a TBK individual Collateral Score reported to be 2.1%
- Starting from Q3 2012 Moody's has announced that a ranking will be available in the overview report using the collateral scores before applying the floor

### Stock Exchange Notice from TBK

#### Update on changes to support mechanisms

Terra BoligKreditt AS (hereafter **TBK**) announced the intention to implement changes to its support structure on 2011-12-15[1], which was further described on 2012-05-04[2], and completed on 2012-05-10[3].

The description state that "Covered bonds issued by TBK are today rated Aa2 by Moody's Investors Service. According to Moody's rating criteria further enhancement of support mechanisms could be supportive to the financial strength of TBK." [2].

Since starting this process, Moody's on 2012-03-09 placed five Norwegian savings banks on review for downgrade[4] and performed a downgrade of the largest Norwegian bank on 2012-05-24[5]. On 2012-10-10 Moody's published the special report "Norwegian banks are sensitive to elevated house prices"[6].

Moody's have reviewed the support agreement. TBK's Covered Bond rating remains **Aa2**, with the TPI at "High"

### Maturity profile

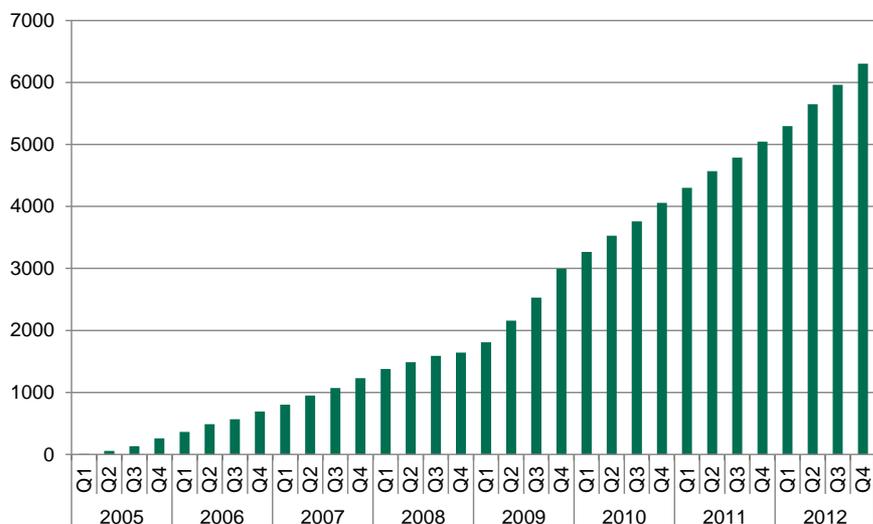

# Funding strategy and activity

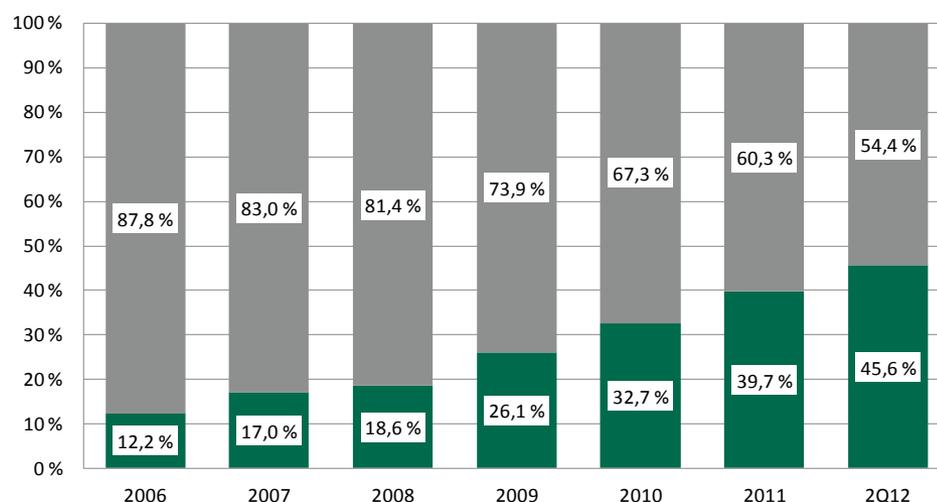

## Funding strategy

- With a stable organic growth, and redemptions starting to materialize in EUR, TBK has evolved from the EUR 500mn no-grow strategy, to an issuer of Jumbo covered with its inaugural EUR 1bn November 2017 transaction launched in late October 2012
- To reflect this shift TBK has increased the European Medium Term Covered Note Program to a size of EUR 20bn
  - Active in both the NOK and EUR funding market
  - TBK has the objective to issue in the Euro covered bond market at least twice a year and to have an established, liquid yield curve

Stable Growth in the loan book (in EUR mn)

## Household debt

- Increased indebtedness reflects, in large part, the high level of homeownership in Norway, at approximately 85 % of households

## Appendix

### Risk positioning (Owner banks)

- Significantly higher retail share compared with Sparebank 1, other saving banks and DNB
- Exposure to agriculture has more in common with retail loans since the house on the farm often makes up the main collateral of the loan
- 0 exposure to shipping and relatively low exposure to commercial real estate
